Experiment – 1

Flight Reservation System Using Zoho One (SaaS)

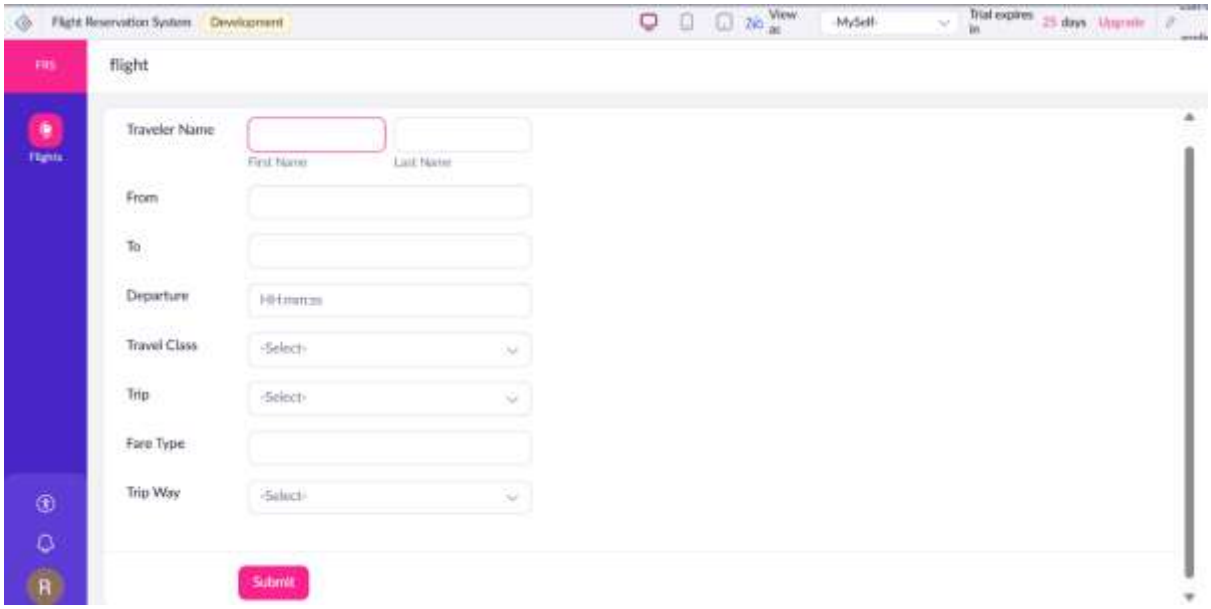

Aim

To create a Flight Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

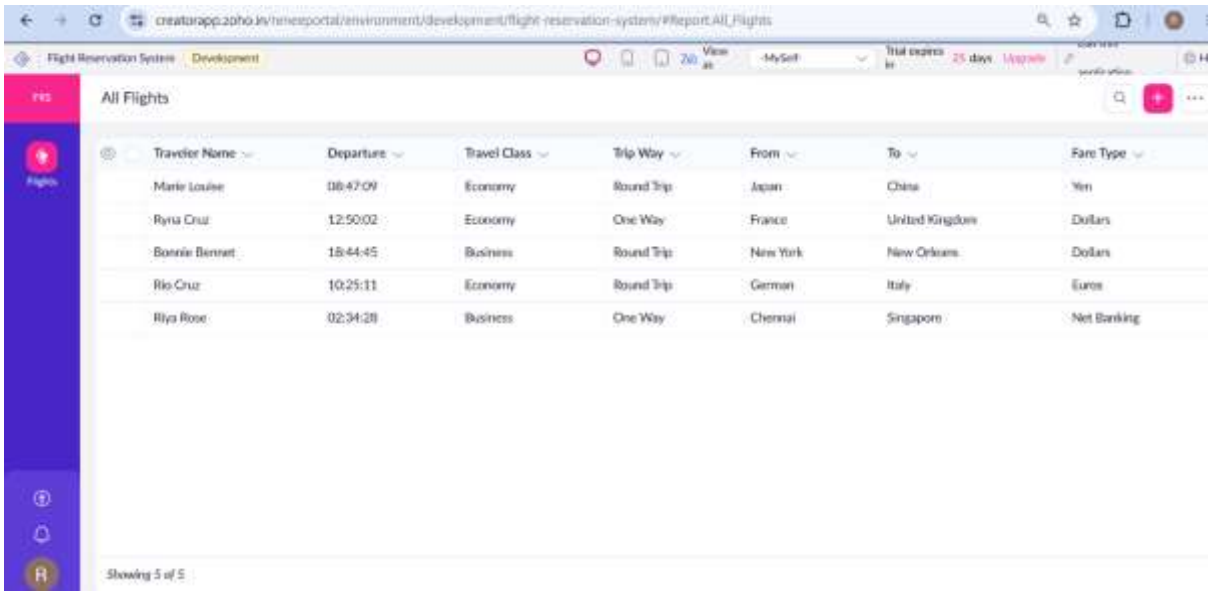

Procedure

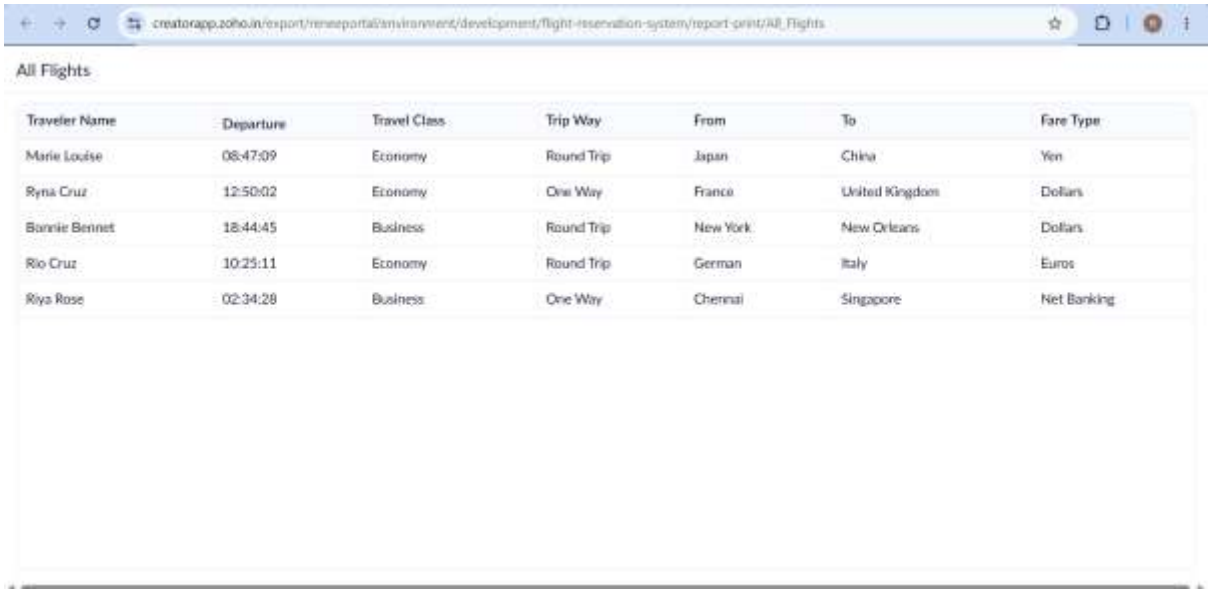

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One application.
3. Create a new application for the Flight Reservation System.
4. Create a new form named **Flight Reservation**.
5. Add the required fields:
    - Passenger Name
    - Flight Type (Domestic / International)
    - Trip Type (One Way / Round Trip)
    - From
    - To
    - Departure Date
    - Return Date
    - Travelers
    - Class
    - Fare Type
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample flight reservation details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different booking details, including one-way, round-trip, domestic, and international flights.
12. Verify that the Flight Reservation System works successfully as a SaaS application.

Input

Output

Result

Thus, a Flight Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
